

WATER SAFETY POLICY

The safety and well-being of children in our care is our top priority. Therefore, we adopted the water safety best practices as promoted by Ministry of Education.

Our school supports play-based learning and sensory exploration and we occasionally use on-premise splash pads, sprinklers, hoses or water tables, under close supervision of our staff at all the time.

We strongly support the physical education and activity of our children. Learning to swim is a very important part of a child's physical development.

Therefore, as part of our program we offer once or two times in a year swimming lessons, under the supervision of qualified instructors, at a local regulated public pool, where:

there are qualified life-guards on duty at all times

the rules of the public pool are followed

the children are accompanied and directly supervised by adults at all times

the children are divided into groups and supervised by swimming instructor

the parents / guardians are advised of the field trip and have signed a consent form
